

1 **Brian Siegel**

2
3 Thank you, Operator.

4
5 Good morning and welcome to Moving iMage Technologies'
6 earnings conference call and webcast.

7
8 With me today is Chairman and CEO, Phil Rafnson, who will
9 provide an industry overview; Francois Godfrey, President
10 and COO, and Co-Founder and Executive VP of Sales and
11 Marketing, Joe Delgado, who will provide a strategy and
12 business overview; and our CFO, Bill Greene. For those of you
13 that have not seen today's release, it is available in the
14 Investors section of our website.

15
16 Before beginning, I would like to remind everyone that,
17 except for historical information, the matters discussed in this
18 presentation are forward-looking statements that involve
19 several risks and uncertainties. Words like believe, expect,
20 anticipates, mean that these are our best estimates as of this
21 writing, but that there can be no assurances that expected or
22 anticipated results or events will actually take place. Actual
23 future results could differ materially from those statements.
24 Further information on the Company's risk factors is
25 contained in the Company's quarterly and annual reports
26 filed with the SEC.

27

28 Now, I'd like to turn the call over to Phil. Go ahead Phil.

29

30 **Phil Rafnson**

31 Thank you, Brian, and thanks to everyone joining us today.

32 I'm Phil Rafnson, CEO of Moving iMage Technologies, or MiT.

33

34 I'm encouraged by the progress we achieved in our first
35 quarter of fiscal 2025, particularly as the industry begins to
36 rebound from the challenges posed by the Hollywood strikes
37 over the past year. Those setbacks appear to be behind us
38 now, and we're energized by the clear signs of a box office
39 resurgence and a lineup of potential blockbuster releases
40 sparking renewed enthusiasm for in-theater experiences.

41

42 The broader industry tone is experiencing a positive shift as
43 well. Major players like AMC, Regal, and Cinemark are
44 reporting solid improvements, highlighting the resilience of
45 the cinema sector. AMC has seen rising attendance,
46 especially for major releases, and Cinemark noted stronger-
47 than-anticipated demand in their third quarter, with
48 audiences embracing both premium experiences and
49 traditional moviegoing. This reinvigorated interest perfectly

50 aligns with our premium offerings—such as immersive
51 sound systems and advanced laser projection upgrades—
52 which are increasingly valued by customers looking to
53 elevate the moviegoing experience.

54

55 Looking at the technology upgrade cycle, the industry is
56 reaching a pivotal point with thousands of projectors and
57 servers due for replacement over the next few years. This
58 need for upgrades represents a growth opportunity for MiT
59 as we continue to support our clients' evolving technological
60 demands.

61

62 As the industry moves forward, MiT is exceptionally well-
63 positioned to capture this growth, leading in cinema
64 innovation with essential products and solutions tailored to
65 meet the high expectations of today's theater-goers.

66

67 Turning to the recent changes in our leadership structure.
68 The industry and our business is at a critical juncture. With
69 cinema rebounding and MiT working on a host of potentially
70 transformational offerings that are in development, I wanted
71 to put in place a long-term succession plan sooner than later.
72 After careful consideration, I decided to promote Francois

73 Godfrey to the role of President and COO, reporting directly
74 to me. Francois brings decades of industry experience with
75 strong relationships and has been a key part of our team
76 moving our emerging growth initiatives towards viability. I
77 look forward to working with him as we move into MiT's
78 next phase as a Company. I'll now turn the call over to
79 Francois to say a few words.

80

81 **Francois Godfrey**

82 Thank you, Phil, and I appreciate the opportunity to join
83 today's call. I'm very excited about MiT's prospects for
84 success in the years to come. Over the next month, I plan to
85 thoroughly review our business and operations to develop a
86 business plan designed to accelerate revenue growth,
87 increase gross margin and take advantage of our operating
88 leverage to generate cash flow and profits. While I don't
89 expect any radical changes, I believe this review may flush
90 out opportunities to increase the baseline in our core cinema
91 business, improve operational excellence and align
92 investment in our emerging offerings with an adequately
93 timed go-to-market strategy. My goal is to share this plan
94 with you on our second quarter earnings call in mid-
95 February. Now I'll turn the call over to Joe to discuss the
96 business in more detail.

97

98 **Joe Delgado**

99

100 Thank you, Francois, and good morning, everyone.

101

102 Starting with our core cinema business, we're encouraged by
103 signs of a promising future. In addition to the industry's
104 ongoing recovery, a key catalyst here is the technology
105 upgrade cycle, with thousands of projector and server
106 combinations expected to reach the end of their lifecycle in
107 the coming years. These upgrades will involve replacing older
108 systems with new laser technology, with prices ranging from
109 \$30,000 to \$130,000, depending on specifications. While we
110 won't capture every opportunity, our expertise in this space
111 gives us confidence that this cycle will contribute
112 meaningfully to our cinema growth over the next few years.

113

114 We're also optimistic about our partnership with LEA
115 Professional, which grants us global distribution rights for
116 their smart power amplifiers in the cinema market. These
117 amplifiers not only offer high margins but also provide an
118 extended warranty—twice the industry standard—which
119 differentiates them from larger competitors. In North
120 America alone, the existing installed base is valued at
121 approximately \$630 million, and an estimated 5-10% of this
122 equipment requires replacement each year, representing a

123 total addressable market of \$32 to \$63 million annually. We
124 continue to scope these products into new builds, and refurb
125 whenever possible. Lastly, we're also in early discussions
126 with potential European customers, and we believe LEA could
127 play an instrumental role in expanding our presence there.

128

129 Next is the Esports in cinemas opportunity, where we've
130 refined and sharpened our strategy over the past few
131 quarters. Initially, our Esports initiative was tied solely to
132 SNDBX, which aims to develop a "Little League" model for
133 Esports. However, delays in SNDBX's rollout due to an
134 extended fundraising period have required us to adapt.
135 Despite this, we can confirm customer interest in this concept
136 has not wavered since SNDBX announced a strong domestic
137 pipeline. Recently, SNDBX pivoted away from relying on
138 external capital to focus on sponsorships and operational
139 plans, targeting an early 2025 launch of its first leagues.
140 Meanwhile, we've adjusted our approach, beginning to
141 pursue direct sales to large theater circuits with the internal
142 capabilities to support Esports leagues. This proactive shift
143 has enabled us to actively engage with theater circuits ready
144 to integrate Esports into their offerings, and we're hopeful
145 these efforts will materialize over the coming quarters.

146

147 Now, let's talk about eCaddy—an incredibly exciting and
148 innovative opportunity for us to expand beyond cinema. The

149 market potential here is significant, with millions of existing
150 stadium and arena seats that could be retrofitted with our
151 eCaddy cupholders, alongside a pipeline of new build
152 opportunities. What sets eCaddy apart is that it's more than
153 just a product upgrade; it's a new model designed specifically
154 for stadiums and arenas. Imagine a cupholder that not only
155 holds drinks but also upgrades the fan experience through
156 services such as advertising or promotions, creating new
157 revenue streams for venues.

158
159 We've received positive feedback from Major League Baseball
160 and other sports executives, and we're currently defining and
161 developing both the model and prototype for this technology,
162 both precursors to being able to submit proposals at select
163 stadiums and arenas. The eCaddy platform has nearly
164 limitless potential, with tens of millions of seats worldwide
165 and the versatility to adapt across various venues. We believe
166 eCaddy can generate high-margin, recurring revenue as it
167 scales, meeting the growing demand for technology-driven
168 fan engagement solutions.

169
170 In summary, despite industry challenges, we've stayed
171 focused on our long-term objectives and made solid progress.
172 Our cinema business is showing signs of turning the corner,
173 and our new initiatives—particularly in Esports and
174 eCaddy—are full of potential. As the industry recovers from

175 recent disruptions, including the Hollywood strikes, we're
176 positioned to see our strategies yield results. We're still in the
177 early stages, but we're excited for what's ahead and look
178 forward to sharing our progress as we reach key milestones.

179

180 With that, I thank you, and I'll turn it over to Brian.

181

182 **Brian Siegel**

183

184 Thanks Joe, and thank you, everyone, for attending our
185 earnings call.

186

187 Q125 was always going to be a tough comp, as Q124 had
188 tailwinds at its back from the continued box office recovery
189 post covid, and momentum from the Barbenheimer
190 phenomenon. Unfortunately, as we've pointed out several
191 times, the Hollywood strikes derailed this momentum for the
192 rest of fiscal 2024, and we are only now starting to see it pick
193 up. So, while our numbers for Q125 were down as expected,
194 we did see encouraging signals that give us optimism for an
195 improved spending environment as we head into the new
196 calendar year.

197

198 Revenue declined roughly 21% versus last year to \$5.3
199 million. The big difference between the two quarter's was last
200 year's revenue contained higher run rate business, fewer, but

201 larger projects and more orders related to the technology
202 refresh cycle.

203
204 Gross profit for the first quarter was \$1.4 million, a 24.6%
205 decline from the prior year. Gross margin was 26.1%, down
206 130 basis points from last year. The encouraging sign here is
207 that the mix improved sequentially versus the prior couple of
208 quarters when we had a large, lower gross margin seat order.

209
210 On the expense side, operating expenses, reflecting the
211 headcount and other cost reductions we made at the
212 beginning of the quarter, were flat at \$1.4 million versus last
213 year. Remember, that we took out roughly \$600,000 of
214 annualized costs, most of which is expected to impact fiscal
215 2025.

216
217 Operating loss was \$68,000, compared to operating income of
218 \$0.4 million last year, and we achieved EPS break-even for the
219 quarter versus \$0.04 per share, last year.

220
221 Looking at our balance sheet, our cash and cash equivalents
222 were down \$32,000 at \$5.2 million, indicating we remain well
223 capitalized.

224
225 Moving to our second quarter, historically, this is our
226 seasonally slowest quarter due to the holiday movie schedule

227 and theaters running at high capacity. While we don't expect
228 this pattern to change, we do believe the comp versus last
229 year should be more favorable given the stronger industry
230 spending environment and cost reductions we took this year.

231
232 In summary, we remain focused on the initiatives and
233 offerings that we believe will accelerate revenue growth,
234 increase gross margins and drive profits. For our investors,
235 we are committed to providing updates on milestones as our
236 emerging growth strategies unfold, and we will continue to
237 announce any key developments or orders through press
238 releases and earnings calls as well as on X, where we
239 encourage you to follow us at our handle
240 @movingimagenews.

241
242 Thank you for joining us today, and we look forward to
243 speaking with you again during our next call in February.
244 Operator, we are ready for questions if there are any.
